## Vol. 29 No. 1 July/August 1994

### 15 M&A Roundtable: Matchmaking Artistry in an Up-Tempo M&A Middle Market

Mid-sized deals are picking up but market conditions are testing dealmakers' skills.

### 24 Why Acquirers May Need to Rethink Terminal Values

*Edward L. Morris*

Calculating the terminal value of an acquisition often is a big headache to the most sophisticated DCF analyst. The stakes in accurate terminal values are rising because these very long-range projections often account for the bulk of a purchase. Using the DCF perpetuity model can help get a fix on the future and set the right price.

### 30 How to Preserve Tax Breaks in Exiting Small Businesses

*Alan Van Dyke*

In five years, investors in small businesses will be able to start excluding half the profits on their stock sales from capital gains taxes. That was a feature of the 1993 tax law designed to pump more investment into smaller companies. But the tax "gift" came with plenty of strings attached.

### 36 Mapping the Right Routes After the Decision to Sell

*Jonathan F. Foster*

What do the owners of a company want most in selling a business? The most value. Getting the heftiest payback often depends on how the business is sold. From the top down, the choices include going public and selling privately. And if a private sale is selected, there are several ways to go, mainly dependent on what the business offers likely buyers.

### 42 Are Boards Facing New Legal Pressures in Stock Swaps?

*Douglas C. Ashton*

Companies with unequal voting common stock or with insider control positions are prompting new questions on their fiduciary duties in doing deals. Does the extra responsibility go with unchallenged decisionmaking power? The *Viacom* decision in Delaware and suits against a controversial Times Mirror divestiture are steps toward filling in the blanks.

### 49 The M&A Fallout From India's Movement to the Mainstream

*Nobel Gulati and Asheesh Advani*

Deregulation of India's industry stirs prospects for brisk mergers and acquisitions activity in the Asian land. Freer markets will require consolidated industries and bigger, more efficient companies. But don't forget the cultural snags, like reluctance to pay consulting fees or get outside dealmaking help at all.

## Vol. 29 No. 2 September/October 1994

### 12 M&A Roundtable: Venture Capital's Big-Time Shift Toward Acquisitions

Better returns, faster exits, and value-creation prospects tempt venture capitalists from traditional start-up investing.

### 21 Using Acquisitions to Buy and Hone Core Competencies

*Marc D. Kozin and Kevin C. Young*

The sharpest acquirers of the 1990s are sizing up targets on how they augment core competencies — a subtle combination of technology, skills, and know-how. But many core competency-driven acquisitions will fail because the buyer was ill-prepared. A systematic approach should define the acquirer's competency and seek compatible targets through due diligence, market intelligence, customized cash flow modeling, and keeping premium personnel.

The *Viacom* decision in Delaware and suits against a controversial Times Mirror divestiture are steps toward filling in the blanks.

### 49 The M&A Fallout From India's Movement to the Mainstream

*Nobel Gulati and Asheesh Advani*

Deregulation of India's industry stirs prospects for brisk mergers and acquisitions activity in the Asian land. Freer markets will require consolidated industries and bigger, more efficient companies. But don't forget the cultural snags, like reluctance to pay consulting fees or get outside dealmaking help at all.

## Vol. 29 No. 2 September/October 1994

### 12 M&A Roundtable: Venture Capital's Big-Time Shift Toward Acquisitions

Better returns, faster exits, and value-creation prospects tempt venture capitalists from traditional start-up investing.

### 21 Using Acquisitions to Buy and Hone Core Competencies

*Marc D. Kozin and Kevin C. Young*

The sharpest acquirers of the 1990s are sizing up targets on how they augment core competencies — a subtle combination of technology, skills, and know-how. But many core competency-driven acquisitions will fail because the buyer was ill-prepared. A systematic approach should define the acquirer's competency and seek compatible targets through due diligence, market intelligence, customized cash flow modeling, and keeping premium personnel.

## 27 Enlisting Personnel of the Target to Combat Resentment

*Thomas M. Begley and Bradley A. Yount*

Resistance by target employees based on resentment toward the buyer has submarined many acquisitions. A key way to win their loyalty is to accelerate integration through advanced planning and get the workers to help plan the post-acquisition operating format. The payoffs can be the greatest when the acquirer has to restructure and cut back the work force because the target has been a poor performer.

## 33 Diligence Checklists: Do They Get the Best Answer?

*Graham Hubbard, Shawn Lofstrom, and Richard Tully*

The best intentions can go awry in due diligence. One problem may be the action-item checklist that emphasizes quantity of information over a true understanding of the target. The authors suggest that the examination process can be sharpened and that harder work is needed on matters like competitive analysis and information systems.

## 39 Why Spanish Firms Have Started Buying Overseas

*Ignacio Suarez-Zuloaga*

Spanish companies, not long ago the target of international acquisitions, are stepping up outbound dealmaking on their own. Competitive pressures within the Spanish economy, professionalized management, and needs to get into the global mainstream are helping trigger overseas investment. Food companies and banks are leading the way to such outposts as Puerto Rico and Latin America.

## 45 The Growing List of Employment Issues Facing Acquirers

*Daniel G. Vilet*

Everything from work place discrimination to anti-drug policies must be checked out in labor/employment due diligence.

## Vol. 29 No. 3 November/December 1994

## 7 Widening Antitrust Coverage in the Era of Technology

*Barry A. Pupkin*

Moving to keep in step with rapid technological advancement, U.S. antitrust regulators have devised the innovation market concept to analyze mergers and other initiatives that threaten anticompetitive control over technology. Full implications are not yet clear. But application of the idea already has scrubbed two deals.

## 12 The Strategic Sweep of Dealmaking in the Middle Market

*Russell J. Warren*

Powerful forces buffeting middle-market companies are requiring many to either buy or be bought. Survival may hang on everything from reduction of supplier lists by big companies to technology and globalization. If it's tougher to do midsized deals, the payoffs are lower risks and more value potential.

## 17 Untapped Options for Creating Value in Acquisitions

*Kenneth W. Smith and Alexander J. Triantis*

It's possible to calculate values for some overlooked ways to add value to an acquisition. They include the options to grow, gain flexibility, and even divest. Including them can quantify the full range of gains available to an acquirer.

## 23 LBO Roundtable: Steering LBOs Beyond Financial Engineering

Build-ups, longer projects, and smaller deals drive the hunt for value by financial buyers in the 1990s. They are the prime responses to shifting conditions in the capital and m&a markets.

## 36 The Many Formats and Faces of the Leveraged Build-Up

*Martin Sikora*

The current hot trend in the LBO market is rooted in strategic development programs pioneered years ago. Value is achieved by starting with a platform company and adding on smaller acquisitions. Fragmented industries are preferred.

### 39 **Dangerous Deal: How a Fast Sell-Off Haunts an LBO Firm**

*Noel D. Humphreys*

How much responsibility does an LBO sponsor bear when it sells a business with product defects? The question may be answered in a case brought against Forstmann Little & Co. by Tompkins PLC which bought gun maker Smith & Wesson in 1987. In allowing the case to go to trial, New York courts apparently have suggested that an LBO firm is not buffered from financial liability.

### 47 **The Metamorphosis of Mohawk From LBO to Big Acquirer**

*David L. Kolb*

Mohawk Industries Inc. has parlayed four major acquisitions to second place in the carpet manufacturing industry. That is a remarkable comeback for a firm that 15 years ago was struggling to survive and was divested in an LBO in 1988.

## **Volume 29 No. 4 January/February 1995**

### 13 **M&A Roundtable: Does the Boom in M&A Pack Staying Power?**

Investment bankers report that with major deal drivers running strong and others to come, the 1993-94 surge is no flash in the pan.

### 21 **Timely Acquisitions for Survival in Hostile Markets**

*Donald V. Potter*

In a hostile marketplace, competition grows faster than the available business. Primary symptoms are too many competitors with too many products, drooping prices, and eroding returns. Survival-minded players should consider acquisitions that not only retire competitors but produce real expansion of the customer base and reduce unit costs without impairing customer service.

### 25 **Seizing the Moment to Capture Value in a Strategic Deal**

*Kenneth W. Smith and James A. Quella*

Acquirers who have suffered from bad acquisitions — that destroyed shareholder value — may be needlessly reluctant to try again. There is a good chance that their deals didn't pay off because the companies were badly put together after the transactions were completed. Successful buyers integrate swiftly and decisively and use their experiences to make the next deal work.

### 31 **The Mid-Sized Firm as a Global Acquirer**

*Haworth Inc.: Richard G. Haworth*

*BE Aerospace Inc.: Thomas P. McCaffrey*

Two vastly different firms — an office equipment manufacturer and a specialist in aircraft interior products and services — have demonstrated that overseas acquisitions are within reach of medium-sized American companies. Both companies fit foreign acquisitions into their strategies because their industries and their customers are globalizing.

### 37 **Scenario Planning for Buyers in Dynamic Industries**

*Duncan and Stephanie McGillivray*

The power of DCF forecasts can be enhanced by the use of scenario planning, especially in calculating the terminal value component of the purchase price paid for a target. The technique, a step ahead of using a constant growth approach, incorporates a wide variety of dynamics that realistically create time-to-time performance differentials. It gives the acquirer a better understanding of an uncertain future.

### 41 **What Bankers Want to Know Before Lending Into JVs**

*William J. Stallkamp*

Experience has taught commercial bankers to treat a combination of basic and special issues when providing credit for joint ventures. At the nub is whether the JV can generate cash to repay the loans. How the parents will support the venture, and perhaps take the bank off the hook, also is critical.

**Volume 29 No. 5 March/April 1995****11 M&A Roundtable: Keeping Acquirers and Sellers on the Right Legal Track**

The interplay of business conditions and legal rules is critical in dealmaking of the mid-1990s.

**20 Scouting the M&A Landscape for Quality Targets**

*Charles E. Paul Jr.*

The information age has put new demands on acquisition search-and-screen programs. Productive efforts that generate quality targets must be pressed by acquirers themselves through strong teams of in-house professionals who know how to gather information from computerized data bases and other sources and analyze it well. Early identification of salable targets is essential in gaining an edge on the competition.

**27 How Seller Financing Can Work for the Buyer**

*Michael L. Sklar*

Seller financing strips within deal structures can be hard to negotiate and offer the potential for post-deal pain. Yet, if deftly handled, subordinated notes, preferred shares, restricted common, and earn-outs can make the difference between winning and losing a deal. They can stretch financing and provide incentives for sellers who stay on to manage the business.

**30 New-Age Challenges to Acquirers in High Technology**

*Mark W. Bailey*

Smartly run high-tech firms are dropping the "not invented here" syndrome and turning to acquisitions to get the products, people, and technology they need. Symantec Corp., a California-based software company and an early exponent of high-tech acquisitions, says good deals minimize risk and hasten product introductions. However, the best deals can turn on bread-and-butter issues like economics, people, and integration.

**37 Determining Environmental Risks Before Divesting**

*John E. Turley*

Increasing numbers of corporate divestors are letting it all hang out when the environmental issues are important to the deal. They are doing their own pre-sale audits to determine whether there are problems. Having the right information helps in negotiations and pricing and satisfies risk-averse financiers.

**40 The Hidden Dangers of Fishing for Deals in Troubled Waters**

*Mark L. Feldman, Stephen G. Moyer, Dennis O'Dea, and John W. Tomes*

The troubled company has a buyer who thinks it can gain strategic advantage at a cheap price. But hang on! Lenders, debt holders, and stockholders all want to be made whole, and anyone can throw the sickly target into bankruptcy.

# 1994 Roster Cross-Index

The Roster Cross-Index is a list of all merger, acquisition, and divestiture activity completed during the calendar year 1994 and reported in the Rosters of *Mergers & Acquisitions*:

Volume 29 No. 1 (1st Q)

Volume 29 No. 2 (2nd Q)

Volume 29 No. 4 (3rd Q)

Volume 29 No. 5 (4th Q)

All companies, both acquiring and acquired, are listed alphabetically. Each listing includes all completed transactions in which that company was involved during the year.

**1st United Bancorp.**  
(merged) Suburban Bancshares Inc. 29, 2: 110

**22nd Century Communications**  
(acq.) SINCLAIR Group (PR Holding Co. and Barrington Color Offset) 29, 5: 81

**2i Inc.**  
(acq.) Dataconsyst SpA (52%) 29, 4: 171
